Cartridges pivot out for easy removal!

The CRS-3 Series Drinking Water System reduces harmful contaminants like some bacteria, viruses, and VOC's and turns common tap water into the fresh, quality water that nature intended us to drink. A 3-stage system filters water at the molecular level. The .03 μ hollow fiber membrane is made from a strong polymeric fiber that removes extremely fine sediment including colloids. The result is simply healthier, better tasting water.

- Environmentally sound water treatment.
- **Cost effective:** the daily cost of bottled water will no longer be a concern.
- **Convenient:** fresh, clean water ready at your tap -- no more handling of jugs.

CRS-3 System Pre-Requirements

- Less than 2000 ppm TDS
- Less than 200 ppm of Chlorine
- Use only on microbiologically safe water

*For best results follow pre-requirements

Model Number	Max Flow	Service Life	Max Pressure	Water Temp.
CRS-3	1 gpm	5,000 gal	125 psi	40° - 125°

*Actual gpm produced will vary depending on water pressure, temperature, and TDS.
